5. Implementation Plan
6. Conclusion

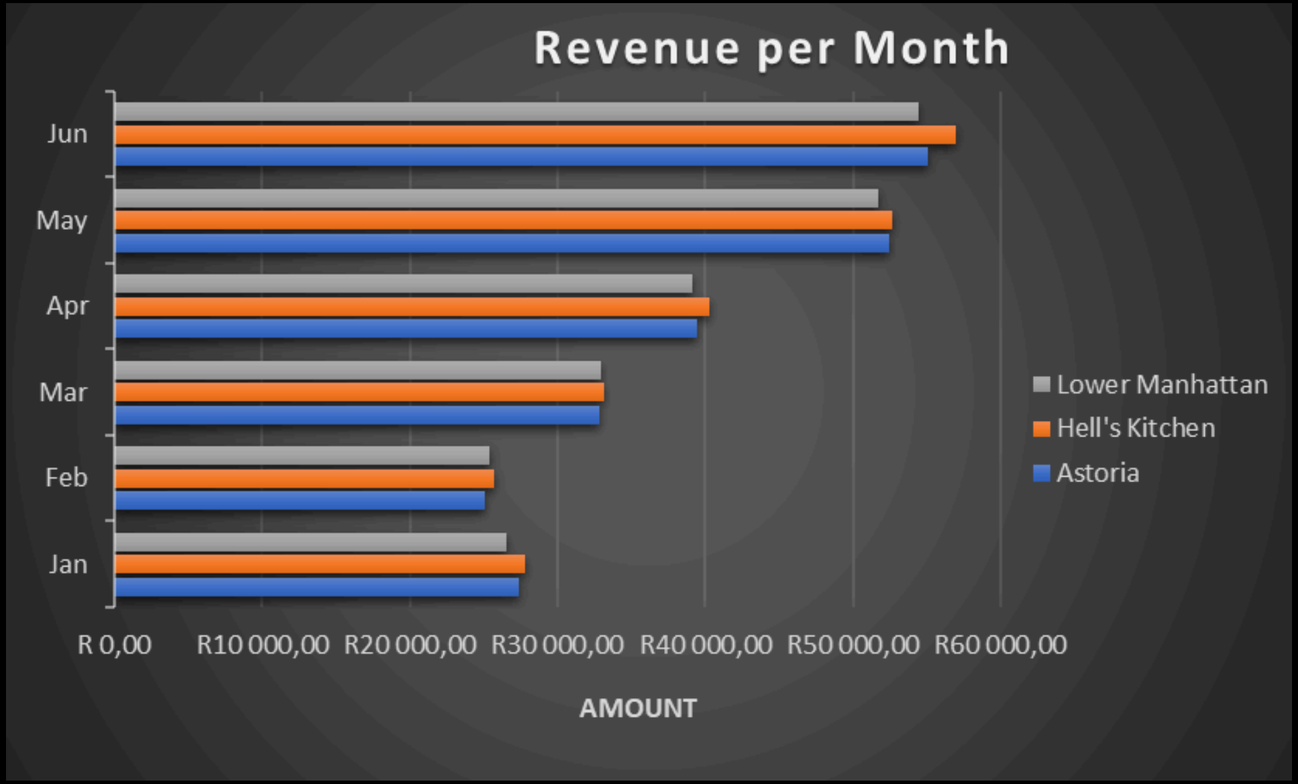
INTRODUCTION

Bright Coffee Shop

I'm presenting the findings in the coffee shop using historical data. I analyzed all data from 3 Bright Coffee Shops for a period of 6 months. The following insights is giving us the clear understanding of the performance of our shops so we can decide where to improve.

REVENUE PER MONTH

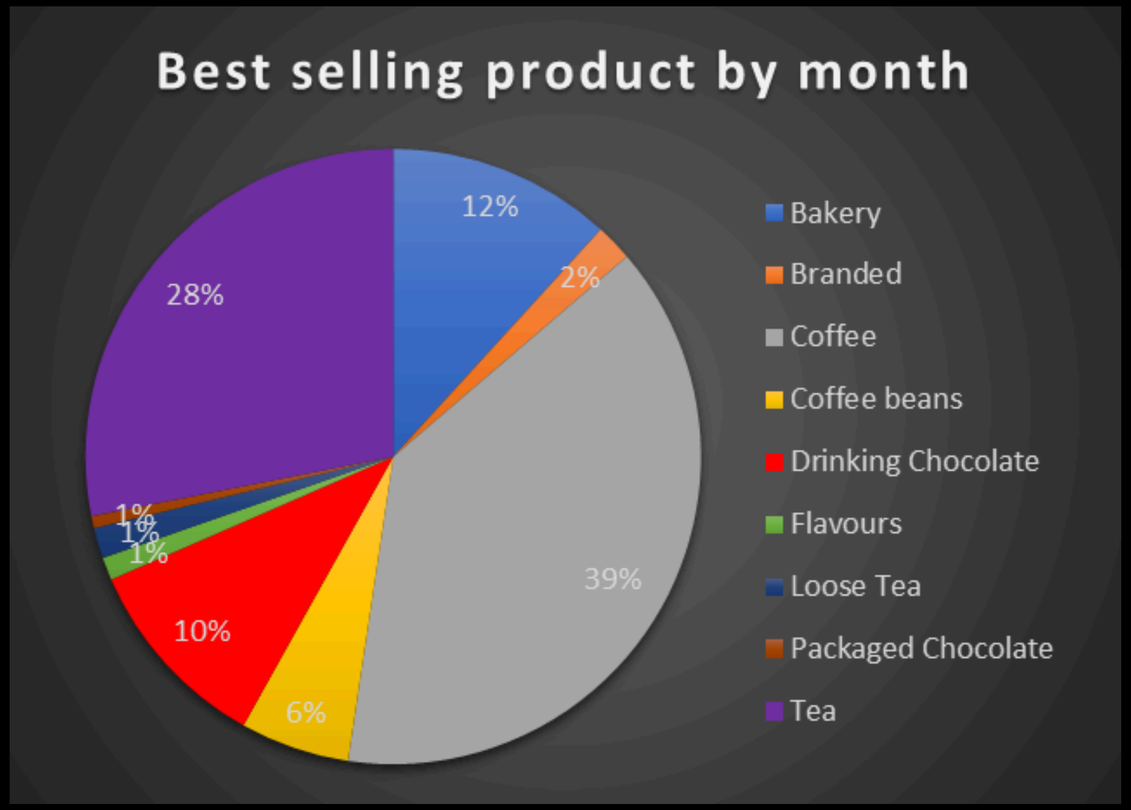
Bright Coffee Shop

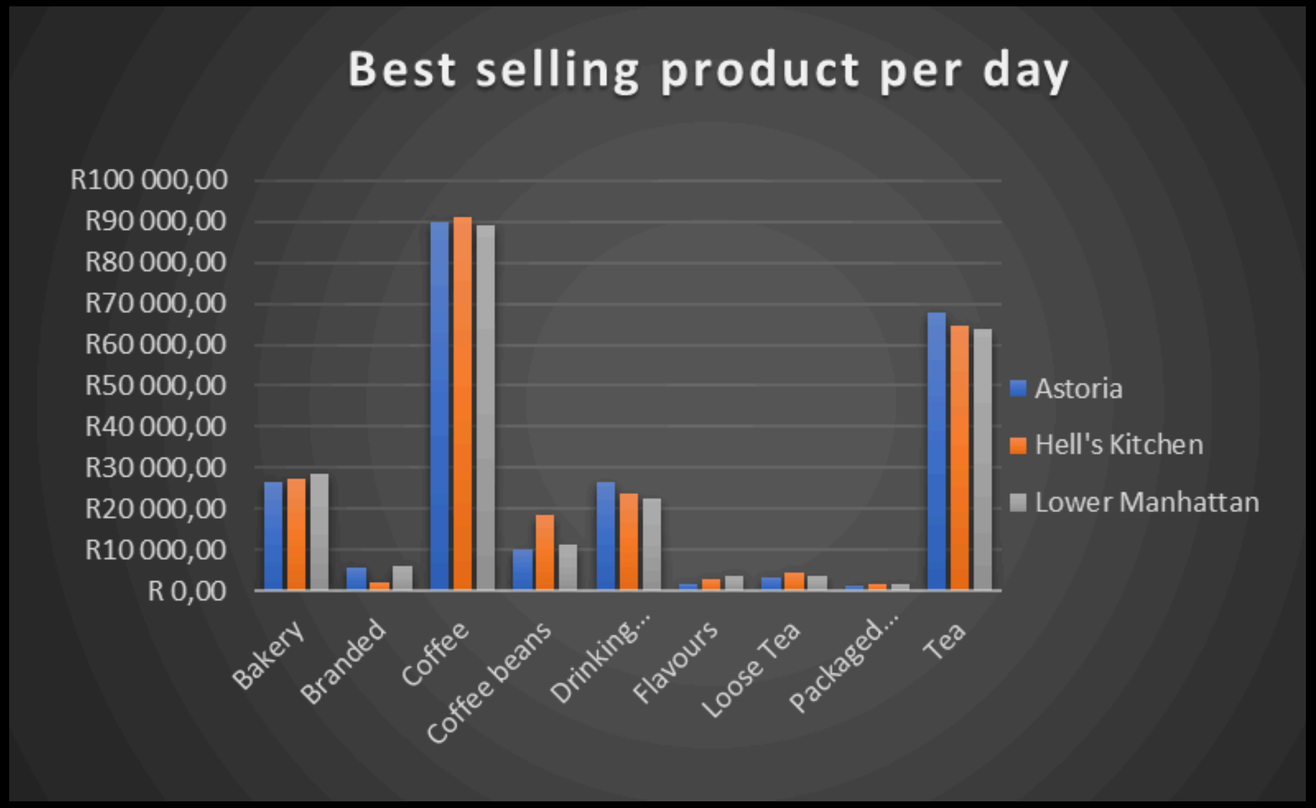


Revenue by store location shows that the performance of all 3 shops improved by over 50% in June since January. the course of this imbalance sales might be coursed of season change .

BEST AND LEAST SELLING PRODUCT

Bright Coffee Shop

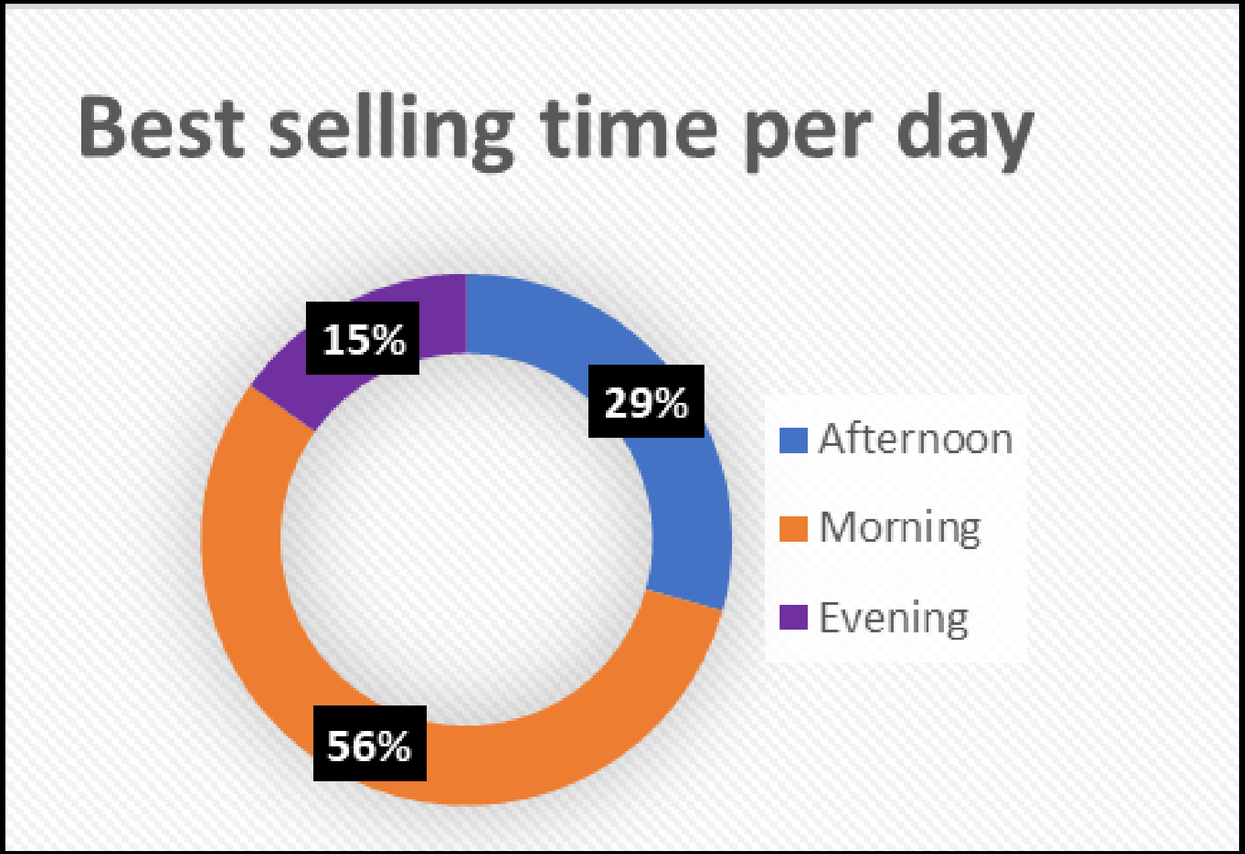




The best selling product per store shows that coffee and tea are the main product in all the stores and we got 3 less selling product which is Packedged chocolate, Loose tea and Flavours.

THE BEST SELLING TIME DURING THE DAY

Bright Coffee Shop

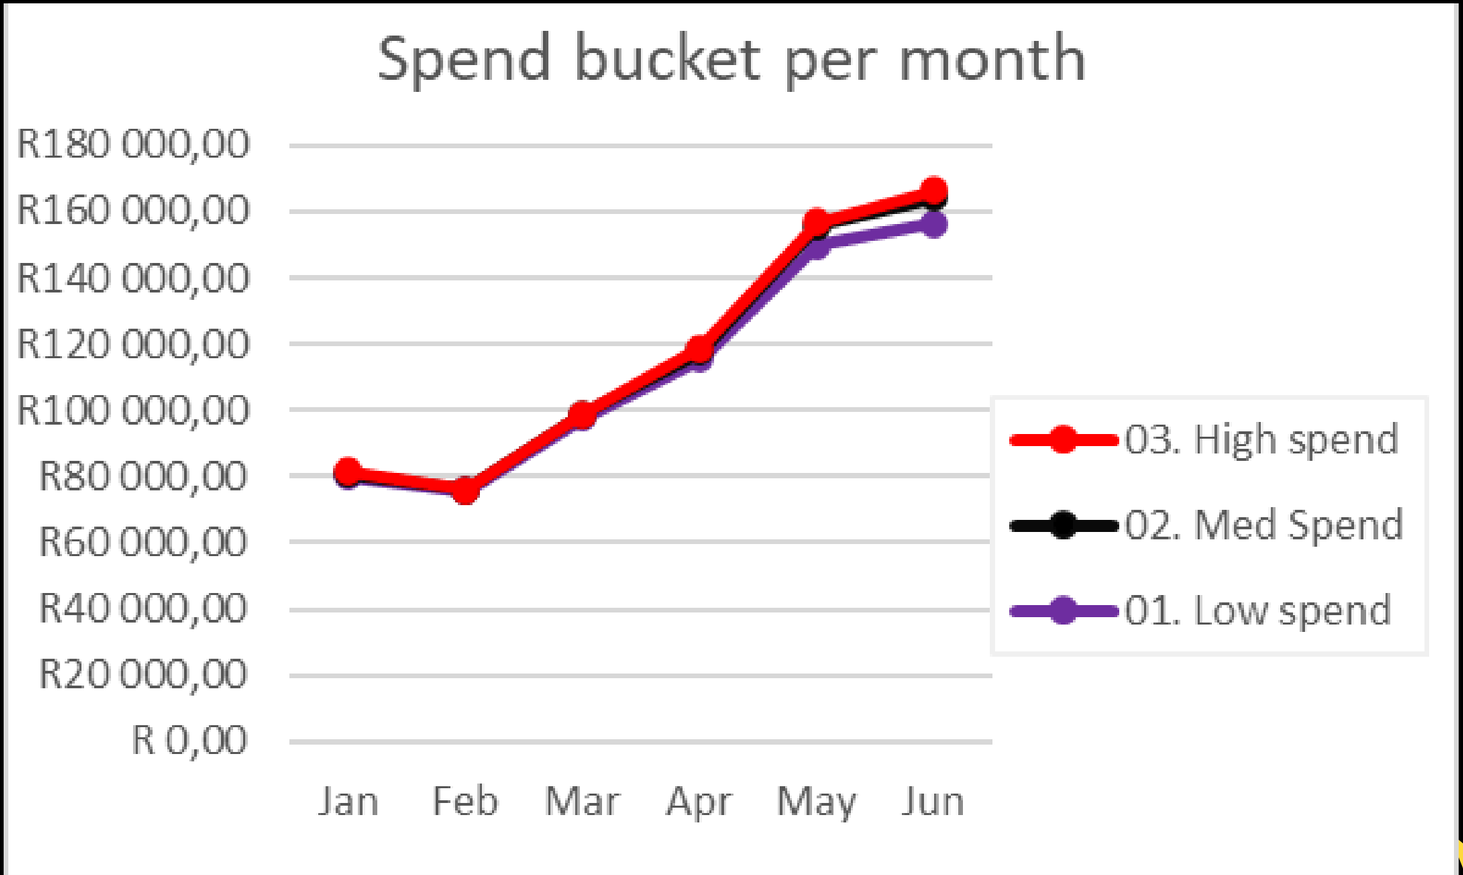


The morning seems to be the best time to be productive because most transections are done during this time an afternoon we got 15% transactions of which is too low.

Bright Coffee Shop

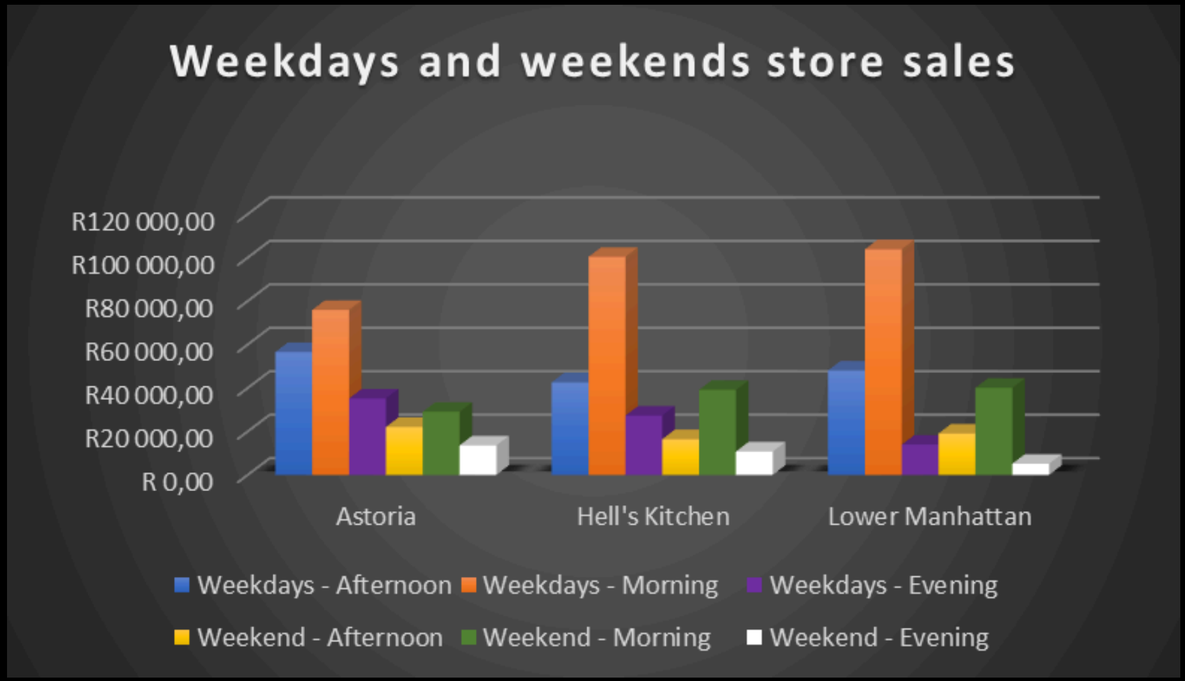
TYPE OF SPENDER

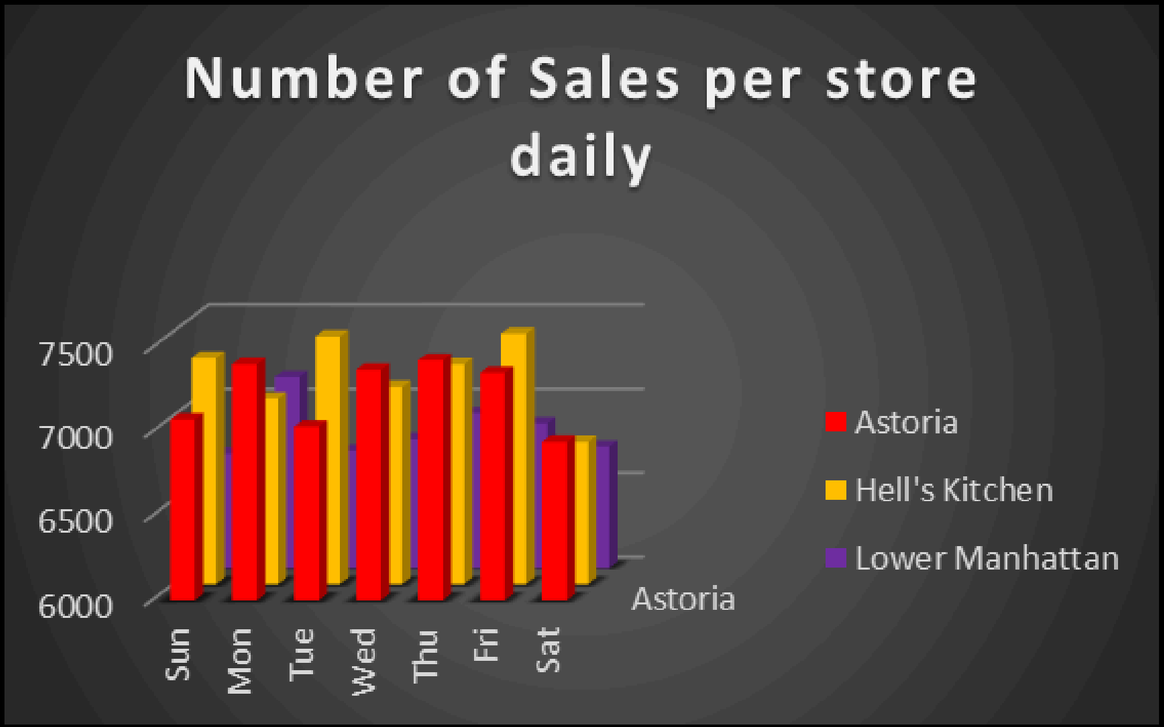
We have high spender customers which we can influence more by proposing discont to the higher spenders .



COMPARING WEEKENDS & WEEKDAYS &TYPE OF SPENDERS

Bright Coffee Shop





weekends and weekdays clear indication that our mornings are most busy. The number of sales per store daily shows the busiest store by different date. Astoria and hell's kitchen shows busiest mid week and Lower Manhattan performs lower most of the days.

RECOMMENDATIONS

Bright Coffee Shop

Based on the insights derived from the historical data of the past six months, I recommend the following actions for the Bright Coffee Shop. The shop that is located in Lower Manhattan appears to be slightly underperforming, which may require more focused effort before collapse. I would also suggest implementation of daily promotions and discounts, as well as expanding the menu with more breakfast option because mornings are the busiest time in this field, you can maybe have option like coffee paired with toasted sandwiches or muffins at half price.

IMPLEMENTATION PLAN

Bright Coffee Shop

1. Maximize Mornings peak.
2. Fix afternoon slump by add promotions.
3. Seasonal Strategy maybe add iced coffee, smoothies in summer.
4. Product and Menu Optimization by removing slow selling items.
5. Marketing and customer engagement.
6. Operations and staffing efficiency.
7. Collecting data and continuous monitoring.

CONCLUSION

Bright Coffee Shop

In conclusion, by leveraging peak morning demand, improving afternoon perfomance and adapting to seasonal trends, the coffee shop can increase revenue, optimize operations,and achieve more consistent profitability throughou the year.
